Project Idea and Purpose: UzBnB

Project type: Web based

I. Introduction UzBnB connects hosts and guests in Uzbekistan, offering short-term stays and fostering community collaboration for diverse and authentic experiences.

II. Project Purpose Address local accommodation needs, streamline booking processes, and enhance trust. Key features include property listings, booking management, user profiles, and a review system for transparent and informed decisions.

III. Expected Impact Empower hosts, attract travelers, and contribute to the local economy. Build connections, encourage cultural exchange, and provide positive experiences for both hosts and guests.

IV. Target Audience Hosts with available accommodations and travelers seeking unique short-term stays in Uzbekistan. Connects property owners with a diverse community for cultural experiences and economic opportunities.
